Number of accompanying persons: …… **Y/N**

☐ Are they Skiing?

☐ Are they going to dinners?

Number of vegetarians: ……

Special anniversary event – excursion to Jungfraujoch research station

To celebrate the **40th anniversary of the ESHLT conference**, we are organising a special excursion to **Jungfraujoch (JFJ) -Top of Europe (3500m), including a visit to the high altitude research station (HFSJG)** on Friday 22nd of January, the last day of the conference. This is a unique opportunity to experience the legendary high-altitude research environment and enjoy one of Switzerland's most spectacular mountain destinations, with a spectacular view of the Aletsch glacier.

Important information:

- **Limited availability**: Due to internal restrictions, no more than 40 visitors are permitted per day to the research station. Therefore, **participation in the special visit is limited to 40 people**, with places allocated on a first-come, first-served basis. Your place will only be confirmed once your registration has been received and availability has been verified.

- **Schedule:** The group will **depart from Wengen train station at 7:42 am**. At the Kleine Scheidegg we switch to the JFJ-Bahn that brings us to the Top of Europe. Apart from the visit to the research station we will have some time to enjoy the touristic attractions of the JFJ. At 13.15 we take the JFJ-Bahn for return allowing to join in time the start of the scientific program at 4:00 pm at the Regina Hotel.

- **Reduced fare**: Participants **do not need a valid ski-pass to access both trains from Wengen**. Instead, we will receive a reduced fare ticket of CHF 50.- (usual price is CHF 210.-!) to travel from Wengen to JFJ and back. Important is to carry the special badge (see below).

- **Special access badge**: A special badge is required to enter the research station. The name provided in your conference registration form will be used to prepare your badge and to notify the research station of your visit. Please ensure that your name is entered correctly and in full.

- **Caution: High altitude!** Please note that JFJ is located at 3500m of altitude. You might feel dizzy a/o exhausted while arriving at this altitude. Move slowly and drink a lot. Occurance of acute mountain sickness is not common due to the short period of stay up there. If you feel really sick, we will organize an earlier train to bring you down to lower altitudes. Alternatively, you might take Diamox® (acetazolamide) the night before.

- **Advanced registration**: Please indicate below whether you wish to participate. Registration for this event will close once all 40 places have been allocated. We hope you will join us for this special anniversary celebration and a memorable visit to the JFJ Research station!

Please register by December 15th at the latest to allow sufficient time to prepare the required access badges and coordinate the visit with the research station.

Would you like to participate in the Friday Jungfraujoch excursion?

☐ YES, I would like to join the excursion
Number of accompanying persons joinging the excursion:……

☐ NO, I will not participate

Do you intend to participate on the following days / events of the meeting
